Terra Universal

# PASS-THROUGH CHAMBERS

Smart® Pass-Throughs with electronic interlocks and LED indicators ensure access to only one operator at a time

BioSafe® Pass-Through Chambers are designed for critical biological applications with strict sterilization protocols

ValuLine™ Pass-Throughs offer a cost-effective, yet robust design with many available material choices

Terra Universal

# LAMINAR FLOW HOODS

Universal Hoods offer deep customization options, user-friendly control panels, and a broad range of add-ons for explosion-proofing, static control, or integrated UV decontamination.

[Shop Now](#)

Horizontal Laminar Flow Hoods offer side baffles, a differential pressure gauge, and Terra's energy-efficient EC FFUs to optimize airflow

Vertical Laminar Flow Hoods deliver a free-standing, vibration-isolated workstation with interchangeable panels and a motorized sliding shield

Terra Smart® and WhisperFlow® Fan Units offer a UL-Listed assembly for strict compliance, and quick connect fittings that reduce, if not eliminate, hand-wired FFU installation.
